

*SMP Users: The fast track to
PCI Compliance begins here.*

How to get ready for

SMPLink™ is credit card interface software developed specifically for Panasonic System Manager Pro (SMP) users that integrates seamlessly with Merchant Link's TransactionVault™ - a system that stores sensitive cardholder data in a secure vault - not on your back office computer.

SMPLink™ is developed and will be validated under the Payment Card Industry (PCI) Payment Application Data Security Standards (PA-DSS) rules.

For more information about SMPLink™, visit <http://www.BuntSoft.com>

SMPLink™ Requirements

- System Manager Pro v.3.5.0035 with Hot fixes
- Microsoft Windows XP Service Pack 3 + all updates (No Vista or Windows 7)
- Microsoft .Net Framework v3.5
- NTFS File system (with simple file sharing disabled)

Your point of sale dealer can help ensure that you are ready for SMPLink™.
